### PECO Energy Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-85 issued to PECO Energy Company (the licensee) for operation of the Limerick Generating Station (LGS), Unit 2, located in Montgomery County, Pennsylvania.

The proposed amendment would revise technical specification (TS) Section 2.1 and its associated TS basis to reflect the change in the Minimum Critical Power Ratio Safety Limit, due to the use of GE13 fuel product line and the cycle-specific analysis performed by the General Electric Company (GE), for LGS, Unit 2, Cycle 5.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:
